

CREATING IBM NODE-RED SERVICE

Date	06 NOVEMBER 2022
Team ID	PNT2022TMID42278
Project Name	Hazardous Area Monitoring for Industrial Plant Powered by IOT

The screenshot displays the IBM Node-RED web interface in a browser. The address bar shows the URL: `node-red-nguab-2022-11-04.eu-gb.mybluemix.net/red/#flow/83a3853aea2beaeb`. The interface includes a sidebar on the left with a search bar and two categories of nodes: 'common' and 'function'. The 'common' category contains nodes like inject, debug, complete, catch, status, link in, link call, link out, and comment. The 'function' category contains nodes like function, switch, change, and range. The main workspace shows a flow named 'Flow 1' with two nodes connected: 'Hello Node-RED!' (a blue node) and 'msg.payload' (a green node). The right sidebar has an 'info' tab selected, showing a search bar and a list of flows. The flow 'Flow 1' is highlighted, and its ID '83a3853aea2beaeb' is displayed. Below the flow list, there is a message: 'Your flow configuration nodes are listed in the sidebar panel. It can be accessed from the menu or with `ctrl-g | c`'.
